### Why Puppy Pre-School?

The first few months of a puppy's life are critical in setting the foundation for a happy, well-adjusted adult dog. This is when your pup will begin to develop relationships and a means of communication, both with other dogs and with humans. Puppies don't know not to chew on your hand, jump up on you or toilet in the house. They will only ever know what you have taught them. We can show you how to solve these behavioural problems.

### How we Train

Our training methods are positive, fun for both you and your pup and reward-based..... and No, reward-based training doesn't mean that you're bribing your dog to do what you ask or that you'll need to use food rewards forever, every time you train!

Reward-based training is simply motivational - no harsh methods are needed.

Our training is based on rewarding the desired behaviour and motivating your pup so that he will enjoy the training sessions. Training should never be frustrating or a chore - it should ALWAYS be fun for both you and your dog.
